

Senior Software Developer

Comparatio, a highly competitive and innovative software development company, has an immediate position available for a Sr. Software Developer. Comparatio is looking for an individual who is self-starter, team player who enjoys project collaboration and desires to do quality work.

Senior Software Developer Job Responsibilities:

- Develops software solutions by studying information needs, conferring with users, project team leaders and stakeholders; studying systems flow, data usage, and work processes; investigating problem areas; and following the software development lifecycle. We have shared ownership of our code base. Anyone can and is expected to work on and improve any piece of code. There are no silos!
- Determines operational feasibility by evaluating analysis, problem definition, requirements, solution development, and proposed solutions.
- Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments, and clear code.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming.
- Improves operations by conducting systems analysis and recommending changes in policies and procedures.
- Updates job knowledge by studying state-of-the-art development tools, programming techniques, and computing equipment, and by participating in educational opportunities, reading professional publications, maintaining personal networks, and participating in professional organizations.
- Protects operations by keeping information confidential.
- Provides information by collecting, analyzing, and summarizing development and service issues.
- Accomplishes engineering and organization mission by completing related results as needed.
- Supports and develops software engineers by providing advice, coaching, and educational opportunities and as equally important is willing to learn from others.
